

Customer Journey Map

Project: Implement Client Script & UI Policy (Incident)

Document Reference: PRJ-INC-P2-001

Milestone: M2 - Requirements

Owner: Rahul (Team Lead)

Status: Submission Ready

Journey: Logging and Updating a High-Impact Incident

Stage	User action	System behaviour (this project)	Emotion
1. Open	Opens a new or existing Incident	onLoad re-applies Urgency / Priority guidance	Neutral
2. Classify	Selects Category, then Subcategory	onChange clears Subcategory when Category changes	Confident
3. Assess	Sets Impact to High	Urgency set to High; Assigned to and Assignment group become mandatory; Urgency read-only	Guided
4. Prioritise	Sets Priority 1 - Critical	Warning message appears	Alerted
5. Submit	Clicks Submit / Save	onSubmit validates Short description; blocks with error if invalid	Corrected, then relieved
6. List review	Edits State from a list	onCellEdit rejects the edit and explains to use the form	Redirected

Moments That Matter

- **Immediate feedback** at stage 3 and 4 - no surprises at save time.
- **Clear redirection** at stage 6 - the user learns the correct path.
