

Problem-Solution Fit

Project: Implement Client Script & UI Policy (Incident)
Document Reference: PRJ-INC-P3-001
Milestone: M3 - Design
Owner: Rahul (Team Lead)
Status: Submission Ready

Problem	Solution element	Fit	Validation
PS-01 Blank Short description	onSubmit script	Direct	UAT-01 to UAT-03
PS-02 Stale Subcategory	onChange on category	Direct	UAT-04
PS-03 No Critical warning	onChange on priority	Direct	UAT-05, UAT-06
PS-04 Inconsistent Urgency	onChange on impact + UI Policy read-only	Direct	UAT-07, UAT-08
PS-05 Unowned High impact	UI Policy Actions (mandatory)	Direct	UAT-09
PS-06 Uncontrolled State edits	onCellEdit script	Direct	UAT-11, UAT-12
Rules must not stick	UI Policy Reverse if false	Direct	UAT-10

Fit Assessment

- **Client-side first** is the right choice for fast feedback and a micro-project scope.
- **Known gap:** controls do not apply to data imports, web services or background updates. A server-side Business Rule is the recommended follow-up.
