

Quality Assurance Test Cases Matrix

Project: Implement Client Script & UI Policy (Incident)

Scope: UI Policy, Client Scripts (onLoad, onChange, onSubmit, onCellEdit) on the incident table

Test Execution Matrix

Test ID	Scenario	Type	Expected Result	Automated simulation	Live UAT
TC-01	Blank Short description on submit	Negative	Save blocked, error shown	Yes	Pending
TC-02	Whitespace-only Short description	Negative	Save blocked	Yes	Pending
TC-03	Short description under 10 characters	Negative	Save blocked	Yes	Pending
TC-04	Valid Short description	Positive	Incident saved	Yes	Pending
TC-05	Category change clears Subcategory	Positive	Subcategory empty	Yes	Pending
TC-06	Priority 1 - Critical warning	Positive	Warning displayed	Yes	Pending
TC-07	Priority changed from 1	Reverse	Warning removed	Yes	Pending
TC-08	Impact High sets Urgency High	Positive	Urgency = High	Yes	Pending
TC-09	Urgency read-only when Impact High	Positive	Field locked	No (UI Policy)	Pending
TC-10	Assigned to / Assignment group mandatory	Positive	Save blocked until filled	No (UI Policy)	Pending
TC-11	Impact not High	Reverse	Mandatory and read-only rules removed	No (UI Policy)	Pending
TC-12	State edit from list	Negative	Edit rejected	Yes	Pending
TC-13	State change on form	Positive	Change saved	No	Pending

Acceptance Criteria Checklist

- ☐ High Impact Control UI Policy active with 3 actions.
- ☐ All 6 client scripts active on the incident table.
- ☐ All 13 test cases executed with screenshots.
- ☐ python automated_tests/test_repository.py prints PROJECT VERIFICATION: PASS.
